How to Score the PHQ-9

PHQ-9 scores can be used to plan and monitor treatment. To score the instrument, tally the numbers of all the checked responses under each heading (not at all=0, several days=1, more than half the days=2, and nearly every day=3). Add the numbers together to total the score on the bottom of the questionnaire. Interpret the score by using the guide listed below.

Guide for Interpreting PHQ-9 Scores	
Score	Depression Severity
≤10	Minimal symptoms of depression
10 - 14	Mild symptoms of depression
15 - 19	Moderate symptoms of depression
20 - 27	Severe symptoms of depression
